

Powerful – Easy to Use – Affordable!

Focus X2 is the world's best-loved performance analysis and athlete development tool. It has now become an essential and integral part of Coaching programmes at all levels around the world.

Focus provides sports science and research staff with the ability to generate a more complete and accurate picture of performance than ever before. It combines a simple, flexible design with a range of unique and powerful analysis tools to bring in-depth analysis potential to all. Focus X2 is an essential tool for those in the business of developing and supporting athletes.

Interactive Video Analysis

Focus X2 can be used to analyse performance in any sport through its unique category set structure. This facility allows you to quickly design and enter the analysis information that you are interested in, and then immediately access and review footage of those specific aspects of play.

This advanced interactive video technology removes the need to wind forward and back through the video, taking you instantly to any aspect of the performance. We provide templates that have been developed and used by international and professional coaches and support staff throughout the world, to be utilised and adapted for your own use.

Data Analysis

Focus X2 automatically generates your statistical information as the data is entered, based on the Category Set that you have devised. The advanced interactive Results Grid facility compiles your stats and then allows instant access to the video context. The information can then be exported to the programme of your choice (e.g. MS Excel) for additional analysis and manipulation if required.

Compilation/Highlight Facility

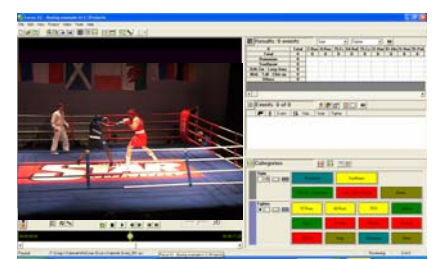

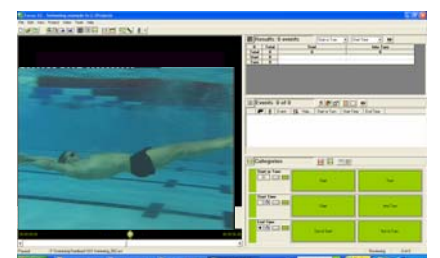

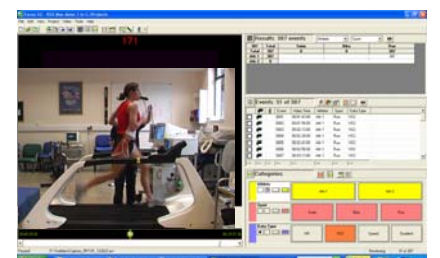

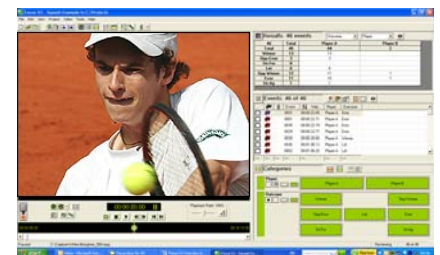

Focus X2 will automatically generate any compilation or highlight footage that you choose. An example in Tennis might be that you wish to put together a compilation video of every 1st Serve winner by a player. Focus will create this automatically for you, ready for copying onto CD/DVD.

Use Focus X2 For...

- Multi-sport analysis. Focus is designed to be easily adapted for any sport
- Detailed and in-depth competition, training and lab-based analysis
- Technical and tactical development individual athletes

Benefits of Using Focus X2...
